1 **Work done in current Week**

In this week I have made a website for peer evaluation and also created a sample database schema to make a presentation of how user will see his own login page as well as what a admin can see when he login. I am also learning database part to make my own database schema.

2 **Further Plans for next Week**

I have to work more on database part.

3 **Reviewers suggestion in Meeting**

1: See the existing edx database schema and then modify your database as per requirement.
2: Build and create your own tables and then match it with existing database of edx.

4 **Reviewer**
