1 Work done in current Week

In this week I have learnt php and how to deal with web-server and database. I had started working on XAMPP that is a cross platform for web-server, mysql and php. It will help me to creat the web-pages for users and what a particular user should be shown and how to handle the database of users.

2 Further Plans for next Week

I have to learn the database schema of all the users and to relate with them along with admin.

3 Reviewers suggestion in Meeting

1: Read about use-case diagram.
2: Start working on D-jango also.
