Performance testing tools

RAJU B
July 2013

1 Introduction

The following tools is used for testing the performance of moodle and other LMS.

1. Apache Jmeter
2. load runner
3. HTTPPerf
4. Rational performance tester
5. WAPT
6. webload
7. OpenSTA
8. QEngine(Manage Engine)
9. Loadstorm
10. Cloud Test

Other than these tools, we have more. These are important one and which are used frequently for performance testing.
