

Introduction

DSpace is a free and open source repository software package, generally used for creating and managing repositories of digital content. Basically, DSpace is a digital archival system which has the best features of content management systems and document management systems. DSpace is used for long-term storage, access and preservation of digital content. DSpace runs on operating systems such as Linux, Ubuntu, Solaris, Windows and Unix.

DSpace is a single integrated application that offers structured workflow for document submission, access controls by group and community for access levels of anonymous access, read, edit, submit, approve and administer, full text indexing of PDFs, Word and other formats, keyword searching frameworks, integration with other library software, repositories, Google Scholar, etc.

DSpace training will be offered using the award-winning Spoken Tutorial methodology. The IIT Bombay Team has created high-quality DSpace Spoken Tutorials, especially suitable for self-learning. Participants will learn 'DSpace' by listening to Spoken Tutorials and practicing them on 'DSpace' software. There will be live interactions between the participants and DSpace experts at IIT Bombay. Thus, this workshop will be conducted through a blended mode. This workshop is organized under the aegis of

the National Virtual Library of India, funded by the Ministry of Culture.

Methodology of the Pilot Workshop

This workshop is limited to the invited users only, IIT Bombay will send the invitation link for the online registration. This workshop is conducted for two different audiences. It is limited to the **Librarians/ library staff and system administrators from each institution**. To participate in this workshop, invited participants have to register online. All the registered participants will attend the workshop from their homes, offices or any other convenient place. Virtual classroom systems will be used to interact with participants. There will be live video interactions and Spoken Tutorial sessions during the workshop. During the Spoken Tutorial sessions, participants are expected to learn DSpace using a side by side method. There will be a separate classroom created for two different audiences (librarian & sys ads) during the practice sessions in the workshop.
